

INFRASTRUCTURE AND HAZARD MITIGATION

Town-wide Cell Phone and Broadband Coverage

This project develops an advocacy group or campaign with the goal of achieving cell service expansion to the Town of Blenheim and the Schoharie Valley. It will seek activation of the existing cell towers at the north and south ends of Blenheim to establish coverage to the entire town. This type of coverage will expand communication capabilities during emergencies.

Next Steps:

- Develop justification and market figures for cell service expansion
- Request resolution of support from Town Boards in Blenheim, Gilboa, Fulton, and Jefferson
- Elicit letters of support from other groups and organizations familiar with the issue
- Engage Congressional and State representatives
